INTRODUCTION..... 16-1

INTRODUCTION

- 16.1 **Chapter 16: Schedule of Commitments**, of the Environmental Impact Assessment (EIA) Report presents a summary of the mitigation, compensation and enhancement measures committed to throughout the EIA Report. All the information contained in Chapter 16 of the EIA Report remains valid unless stated otherwise in this Supplementary Environmental Information (SEI) Chapter.
- 16.2 The purpose of this Chapter of the SEI is to:
- provide a summary of the additional mitigation, compensation and enhancement measures committed to throughout the SEI document. These additional measures may be the result of consultation since the application or measures deemed appropriate as a result of the amendments to the proposed development.
- 16.3 **Table 16-1** provides a summary of additional mitigation, compensation and enhancement measures committed to throughout the SEI document.

Table 16-1: Schedule of Commitments

SEI Chapter	Type of Mitigation, Compensation or Enhancement	Mitigation, Compensation or Enhancement Measure
SEI Chapter 10: Hydrology, Hydrogeology, Geology and Soils	During and post Construction.	<p>The amended access track to Turbine No.5 – 11, passes adjacent to a man-made drain, which it is assumed was established to locally drain soils and improve grazing.</p> <p>It is evident that the drain does not convey a significant quantity of water and is not part of the natural drainage network. It is proposed therefore, as part of the track construction works to remove the drain and restore this area. The restoration works would be supervised by the proposed site Environmental Clerk of Works (ECOW) using site won soils. Removing the drain would locally improve habitat and allow its rewetting and establish a buffer from the track to water features.</p>
